

Electric Floor Heating Electrical Requirements

Warm Solutions electric floor heating is classified as an electrical appliance. All electrical connections, including the connection of the thermostat must be undertaken by a licensed electrician, in accordance with current electrical codes of practice, AS/NZS3000:2000 and state codes.

The heater element must be connected to a circuit with RCD protection. Please ensure any existing cabling and RCD's already installed are working correctly and capable of handling the additional load for the floor heating as specified.
